

Getting the Most Out of the Canadian Electronic Library/desLibris in *EBSCO Discovery Service*

Canadian Electronic Library has been active as a Canadian e-book aggregator since 2005.

Through its **desLibris** platform, Canadian Electronic Library distributes books from over 80 scholarly and independent Canadian publishers and monographs from over 1000 think tanks and public policy groups in Canada. All titles are available for library licensing; all are accompanied with full MARC records. There are over 70,000 monographs in the collection to date. The service is in use in every university in Canada.

See desLibris at <http://www.deslibris.ca>

To ensure that use of your licensed Canadian Electronic Library products and collections are optimized within EDS, you will need to:

1. Check your licensed collections are correctly activated in your EDS profile and also in the knowledge base of your link resolver.
2. Select your full-text linking option(s) and configure appropriately.
3. Check other EDS configuration options. For details on each of these steps, see below.

Activating Canadian Electronic Library Content in *EBSCOadmin*

By default, all new customers receive Canadian Electronic Library metadata as part of the EDS base index. In addition, your *EBSCOhost* database subscriptions, as well as subscriptions to other EDS content partners, are core to providing unified access.

To ensure Canadian Electronic Library results are discoverable in EDS you will need to make sure the appropriate databases are enabled. For instructions on adding or removing a database from your EDS profile in *EBSCOadmin*, see

https://help.ebsco.com/interfaces/EBSCO_Discovery_Service/EDS_Admin_Guide/Managing_your_content_in_EDS.

1. EDS base index content includes:
 - Publisher Provided Full Text Searching File (edb)
 - Academic Search Index (asx)
 - Business Source Index (bsx)
 - Supplemental Index (edo)

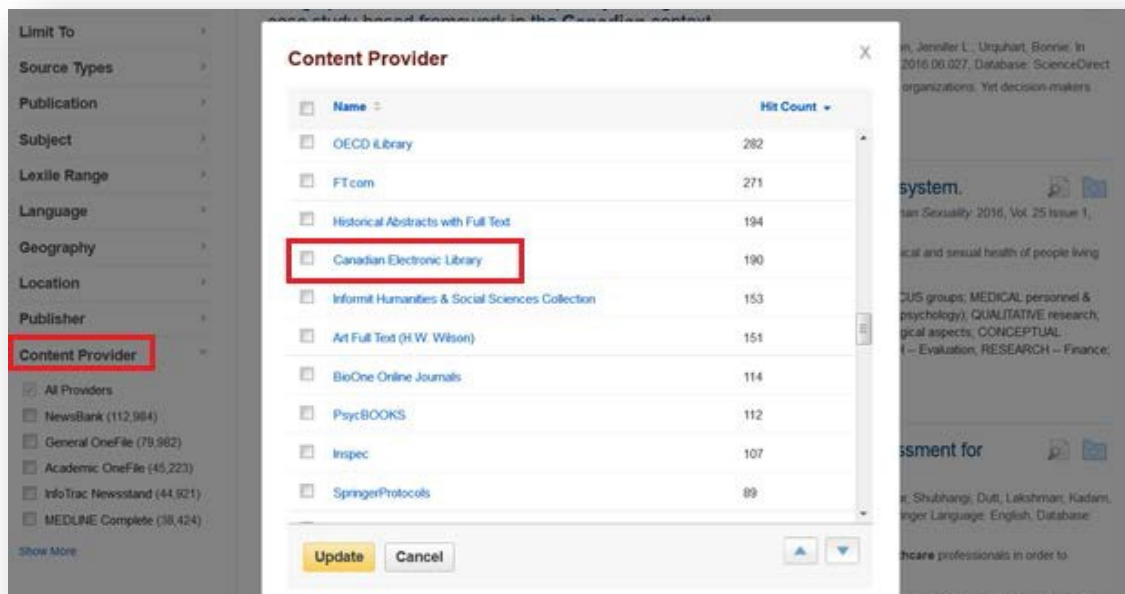

Please note: If you subscribe to any version of EBSCO's Academic Search or Business Source products and have these enabled in your EDS profile, you will not need the corresponding Academic Search Index or Business Source Index databases.

2. Products indexed as EDS partner databases.

- EDS - Canadian Electronic Library (desLibris)
- EDS - Canadian Electronic Library (eBrary) (to be discontinued December 2016)

Locating Canadian Electronic Library Content in *EBSCO Discovery Service*

To limit your EDS search results to Canadian Electronic Library content, use the Content Provider facet:

Linking from *EBSCO Discovery Service* to Canadian Electronic Library

To enable linking from EDS to full text, you should set up the corresponding **Canadian Electronic Library** CustomLink(s) as well as your link resolver. Administrators can customize full-text links at any time using *EBSCOadmin*, which also allows a customer to choose to display a single option for users to access full text (preferred and the default) or multiple options, such as **Canadian Electronic Library** CustomLink(s) and your link resolver.

Using CustomLinks to Canadian Electronic Library

You can use Canadian Electronic Library CustomLinks to link from EDS to the full-text content you subscribe to on the appropriate Canadian Electronic Library platform. Once you've confirmed that your subscriptions are included in your EDS profile, you can set up CustomLinks. For help setting up CustomLinks and enabling CustomLinks on profiles, see

https://help.ebsco.com/interfaces/EBSCOadmin/Admin_User_Guide/Setting_up_EBSCO_CustomLinks_in_EBSCOadmin.

To set up a CustomLink from EDS to Canadian Electronic Library:

1. Log in to *EBSCOadmin* at <http://eadmin.ebscohost.com>.
2. Click the **Site/Group Maintenance** button, then click on **Go** below CustomLinks.

- Click **Add New CustomLink** and mark the Select box to the left of the CustomLink name.
- Click **Submit**. Your changes are saved. Repeat steps 10-13 for any other profiles to which you want to add your CustomLink.

Using a Link Resolver CustomLink

A link resolver is software that uses OpenURL data to provide item-level linking among the various online options. In order to display the link to the link resolver on the search results page, your link resolver needs to be activated as a CustomLink in EDS.

The link resolver CustomLink is configured to key off of the local collections and enables the Available in Library Collection (AiLC) limiter, thus displaying the link to your link resolver on all records that are known to be in your library collection. If you have a link resolver, you will want to make sure that the subscriptions you have with Canadian Electronic Library are enabled in your link resolver's knowledge base.

If you are a *Full Text Finder* customer, a link resolver CustomLink will be automatically added to your EDS profile. In addition, your EBSCO Knowledge Base collections will be imported to *EBSCOadmin* to enable the AiLC limiter.

If you use a third-party link resolver such as SFX or 360 Link, you will need to set up your link resolver CustomLink, and you will be able to import your knowledge base holdings to enable the AiLC limiter. This will be done as part of the EDS set-up process. For more information on how to automatically update your collections in EBSCOadmin, see the following Support page:

https://help.ebsco.com/interfaces/EBSCO_Discovery_Service/EDS_Admin_Guide/Available_in_Library_Collection_limiter_Serial_Solutions_SFX.

Ranking Full-Text Links in EDS

EBSCOadmin allows administrators to set the order of the full text links that appear on the EDS result list for each record. For example, if you would like one of your Canadian Electronic Library CustomLinks to appear before EBSCOhost full text or your link resolver, the order can be adjusted to display it accordingly. It is important to think about the order of the links for your institution because preferences do vary.

For more information on CustomLink order, as well as instructions on ordering your CustomLinks, see the Support FAQ Ranking CustomLinks in EDS at:

https://help.ebsco.com/interfaces/EBSCO_Discovery_Service/EDS_Admin_Guide/Ranking_CustomLinks_in_EDS

Note the option to “Show First Available Full Text Only.” If this option is checked and an item is available both from Canadian Electronic Library and, for example, Cengage Learning, then only the first of these would show, i.e. the one that is listed highest in the CustomLink ranking. EBSCO strongly recommends that you carefully consider the CustomLink order in EBSCOadmin.

EDS Search Features

EDS has two features designed to ensure users receive the highest quality records related to their searches: Relevance Ranking and Record De-Duplication.

Relevance Ranking – EDS uses an advanced algorithm to rank records in order of relevance to the search term and importance to the user. This algorithm weighs search term matches in the record based on the fields the match occurs in. For more details on this feature, see this Support

FAQ:

https://help.ebsco.com/interfaces/EBSCO_Discovery_Service/EDS_FAQs/relevance_ranking_determined_in_EDS.

Record De-duplication – For records that match on core fields like title, author, date, volume and issue, EDS automatically removes records with lower relevancy from the result list in favor of higher ranked records. For more details on this feature, see this Support

FAQ:

https://help.ebsco.com/interfaces/EBSCO_Guides/General_Product_FAQs/prevent_duplicate_results_in_search_results.

These two features, which are key to the EDS experience, do not discriminate by record origin. Records from any source — either content received from publishers or indexed by the EBSCO Editorial staff—may appear higher in the result list or win out in record de-duplication.

Still Need Help?

You can contact *EBSCO Discovery Service* Customer Support at support@ebSCO.com if you need help accessing the Canadian Electronic Library content in EDS or have any questions. For the most up-to-date version of this guide, please see http://support.ebsco.com/eds/content/en_eds_CanadianElectronicLibrary_quickrefguide.pdf
